## Relevant Work Experience

**Circulr Inc.** – Full Stack Mobile Developer. Toronto, ON. (remote)  
SEPT 2021 – DEC 2021

- Developed a cross-platform mobile application to help Circulr reach new customers in their mission of reducing waste.
- Used the Flutter framework to program the app for both Android and IOS platforms.
- Integrated backend as a service through Google's Firebase platform to store user data and purchase/return history.
- Integrated the Stripe API to allow for user payments when adding certain items.

**Firefly Creative Inc.** - Web Designer/Developer. Toronto, ON.  
JUNE 2016 – JUNE 2018

- Used HTML, CSS, and JS to build and launch several websites for a range of different clients.
- Used Adobe Creative Cloud Platform software to design website and e-mail template mockups and wireframes.
- Maintained websites after launch to keep content updated and handle SEO to improve search engine rankings.
- Communicated with different clients to get an understanding of their digital needs and build websites accordingly.

## Volunteer Experience

**Data For Good** - Web Designer/Developer. Toronto, ON.  
APR 2017 – JAN 2018

- Collaborated with DFG team to overhaul website through applying organization branding specifics and making the site mobile friendly.
- Used the WordPress CMS to create additional blogging microsites for different chapters based around Canada.
